ABOUT

B.Tech CSE student and technology builder. I turn ambitious ideas into working products across AI, software, hardware, and robotics. From AI companions to

wearables, robots, and edge intelligence. Philosophy: I don't just learn. I build.

EXPERIENCE

VOIKES Technologies Pvt. Ltd. - Founder / Technology Builder (Present)

Building AI-powered products across MedTech, assistive technology, robotics, software, and embedded systems - from research to prototyping and product.

INAMIGOS Foundation - AI Data Analyst Intern

Worked with AI and data-oriented workflows in data analysis and problem solving.

SELECTED PROJECTS

VIONEX - AI Personal Health Companion (SIH26181)

Wearable health band, edge AI monitoring, robotic assistant, caregiver support.

VOKA - AI Companion (robot + avatar) MYRA - AI Fashion Assistant

VOXLENS - Smart Glasses VOSIGN - Smart Glove VOZO - Offline P2P Chat

HACKATHONS & EVENTS

Smart India Hackathon x2, TechExpo, Thrive, ProTech, DevFest

SKILLS

AI & ML: GenAI, LLMs, Computer Vision, Multimodal, Speech, Edge AI

Programming: Python, C++, JavaScript, TypeScript, SQL

Development: React, React Native, Next.js, Node.js, FastAPI, Firebase, Expo

Robotics & Embedded: Raspberry Pi, Arduino, ESP8266, sensors, servo, IoT

3D & Interactive: Unreal Engine, MetaHuman, Blender, 3D modeling

Currently exploring: Edge AI, AI Agents, Wearables, Human-AI Interaction
